

PU2164

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of the claims in the application:

Listing of Claims:

1. (Currently amended) A wood-type golf club head comprising:

a body having a face member composed of a metal material, the face member including a face plate and a face extension, the face extension extending laterally rearward from a perimeter of the face plate, a crown and a sole, the body composed of a metal material, the face plate having an aspect ratio ranging from 1.0 to 1.7 and a face area ranging from 4.00 square inches to 7.50 square inches, the face plate having a plurality of scorelines thereon, wherein the face plate comprises a central circular region having a base thickness, a first concentric region having a first thickness wherein the base thickness is greater than the first thickness, a second concentric region having a second thickness wherein the first thickness is greater than the second thickness, a third concentric region having a third thickness wherein the second thickness is greater than the third thickness, and a periphery region having a fourth thickness wherein the fourth thickness is less than the third thickness; and

a body including a crown and a sole coupled to the face extension of the face member,

wherein the golf club head has a volume no greater than 400 cubic centimeters,

[[;]]

wherein the golf club head has a coefficient of restitution of ranging from 0.80 to 0.93 under standard USGA conditions, [[;]] and

wherein the golf club head has a mass ranging from 165 grams to 300 grams.

PU2164

2. (Currently amended) A wood-type golf club head comprising:

a body having ~~a face plate~~, a crown and a sole, the body composed of a metal material; and [[:]]

a face member composed of a metal material, the face member including a face plate and a face extension, the face extension extending laterally rearward from a perimeter of the face plate, the face plate having an aspect ratio ranging from 1.0 to 1.7 and a face area ranging from 4.00 square inches to 7.50 square inches, the face plate having a plurality of scorelines thereon, wherein the face has a plurality of concentric regions of varying thickness with the thickest region in the center, [[:]]

wherein the golf club head has a volume no greater than 400 cubic centimeters, [[:]]

wherein the golf club head has a coefficient of restitution of ranging from 0.80 to 0.93 under standard USGA conditions, [[:]] and

wherein the golf club head has a mass ranging from 165 grams to 300 grams.

3. (Currently amended) A wood-type golf club head comprising:

a body having ~~a face plate~~, a crown and a sole, the body composed of a metal material; and [[:]]

a face member composed of a metal material, the face member including a face plate and a face extension, the face extension extending laterally rearward from a perimeter of the face plate, the face plate having an aspect ratio ranging from 1.0 to 1.7 and a face area ranging from 4.00 square inches to 7.50 square inches, the face plate having a plurality of scorelines thereon, [[:]]

PU2164

wherein the golf club head has a volume no greater than 400 cubic centimeters,

[[:]]

wherein the golf club head has a coefficient of restitution ranging from 0.80 to 0.93 under standard USGA conditions, [[:]] and

wherein the golf club head has a mass ranging from 165 grams to 300 grams.

4. (Previously presented) The wood-type golf club head according to claim 3 wherein the depth of the golf club head from the face plate to a rear of the crown ranges from 3.606 inches to 3.741 inches.

5. (Previously presented) The wood-type golf club head according to claim 3 wherein the volume of the golf club head ranges from 260 cubic centimeters to 350 cubic centimeters.

6. (Previously presented) The wood-type golf club head according to claim 3 wherein the face area of the face plate ranges from 4.50 square inches to 5.50 square inches.

7. (Previously presented) The wood-type golf club head according to claim 3 wherein the mass of the golf club head ranges from 175 grams to 225 grams.

8. (Previously presented) The wood-type golf club head according to claim 3 wherein the crown has a thickness ranging from 0.025 inch to 0.060 inch.
